The Company

Falcon Medical Italia is the Italian daughter company of Falcon Surgical, a leading manufacturer which for over thirty years has specialized in manufacturing instruments for surgery, dentistry, dental laboratories, cranio maxillo facial surgery, body care and veterinary.

Thanks to continuous innovation and the use of certified raw materials, Falcon Surgical has been able to develop such a comprehensive variety of instruments as to satisfy the varying and increasingly severe requirements of an international audience both in terms of quality and range.

To date Falcon Surgical is present with own subsidiaries in Germany, England, Italy and Poland.

L'azienda

La Falcon Medical Italia è l'emanazione nazionale di un'azienda leader, la Falcon Surgical, che da oltre 30 anni si è specializzata nella produzione di strumenti per odontoiatria, odontotecnica, chirurgia cranio maxillo facciale, veterinaria, chirurgia e bodycare.

Grazie ad una continua innovazione e all'utilizzo di materie prime certificate, la Falcon Surgical è riuscita a realizzare una gamma completa di strumentario capace di soddisfare le più sofisticate esigenze di una platea internazionale sia in termini qualitativi che di gamma.

Ad oggi la Falcon Surgical è presente con proprie filiali in Germania, Inghilterra, Italia, Polonia.

Quality Guarantee

As a result of the experience accumulated in over three decades and the stringent quality control tests both in production and at the final stages of manufacturing Falcon Surgical is in a position to guarantee a consistent level of quality of any product in their range.

Garanzia di qualità

Grazie ad un'esperienza trentennale e ai severi controlli in produzione e finali la Falcon Surgical è in grado di assicurare le piu' ampie garanzie di qualità costante di ogni suo prodotto.

Customer Care

Our customer care department will be glad to help vis a vis any request for assistance.

Assistenza clienti

Un servizio clienti sarà comunque a Vostra disposizione per ogni tipo di assistenza o richiesta.

Manufacturing Activities

All Falcon Instruments are made using state of the art materials and manufacturing techniques which extend to the use of sophisticated metals and alloys such as titanium and nickel titanium.

All manufacturing activities are performed under Quality Assurance conditions as laid forth by the EN ISO 9001 and 13485 norms (all of which has been certified and is being continuously monitored by recognised international bodies) and in compliance with all laws and directives ruling the distribution of Medical Devices.

La produzione

Tutto lo strumentario Falcon viene prodotto utilizzando materiali e tecniche costruttive allo stato dell'arte che comprendono in alcuni casi metalli o leghe nobili quali (ad esempio) titanio e nichel titanio.

La produzione avviene in regime di Assicurazione Qualità secondo le norme EN ISO 9001 e 13485 (come certificato e costantemente monitorato dai riconosciuti organismi internazionali preposti) e nel rispetto di tutte le Leggi e Direttive che regolano l'immissione in commercio dei dispositivi medici.

Rubber dam clamps / Uncini per diga € 4.25

The range of 17 Rubber Dam clamps on this page is complete for any requirement. These clamps simplify the vast and confusing range of rubber dam clamps available in the market. These clamps substitute many existing patterns, comparison with old pattern clamps are given in brackets beside Figure.

La gamma dei 17 modelli di uncini rappresentati su questa pagina è in grado di coprire qualsiasi necessità e quindi di semplificare la vasta e talvolta confusa varietà di modelli presenti sul mercato. Ciascuno degli uncini in gamma può quindi sostituire molti dei vecchi modelli usati sin qui secondo le indicazioni fra parentesi a fianco di ciascun codice.

DR.905.001

Fig. A
(14,18A)
Molars, deciduous molars and part erupted teeth.
Molari, molari decidui e denti parzialmente spuntati.

DR.905.002

Fig. AW
(14,18A)
Molars, deciduous molars and part erupted teeth.
Molari, molari decidui e denti parzialmente spuntati.

DR.905.003

Fig. BW
(4,5,8,14)
Molars with good gingival retraction.
Molari con buona retrazione gengivale.

DR.905.004

Fig. C
(6,9,15,212)
Incisors, canines and bicuspid.
Incisivi, canini e bicuspidi.

DR.905.005

Fig. DW
(2, 7)
Small molars & large bicuspid.
Molari piccoli e bicuspidi grandi.

DR.905.006

Fig. E
(00,0,2,2A,9,15,18A)
All Incisors, canines and premoals with limited gingival retraction.
Tutti gli incisivi, canini e premolari con retrazione gengivale limitata.

DR.905.007

Fig. EW
(00,0,2,2A,9,15,18A)
All Incisors, canines and premoals with limited gingival retraction.
Tutti gli incisivi, canini e premolari con retrazione gengivale limitata.

DR.905.008

Fig. FW
(14A)
Very stable molar clamp.
Uncino molto stabile per molari.

DR.905.009

Fig. G
(1,2,2A)
Small 3rd molars, deciduous molars, bicuspid & canines.
Piccoli terzi molari, molari decidui, bicuspidi e canini.

DR.905.010

Fig. GW
(1,2,2A)
Small 3rd molars, deciduous molars, bicuspid & canines.
Piccoli terzi molari, molari decidui, bicuspidi e canini.

DR.905.011

Fig. HW
(14W)
Extended arch version of AW.
Versione estesa ad arco di AW.

DR.905.012

Fig. JW
(26A)
Large molars with deep gingival fit.
Grandi molari con inserimento gengivale profondo.

DR.905.013

Fig. K
(3,4,5,7A,8,10,11,26,7,8A)
General winged molar clamp.
Uncino alato per molari.

DR.905.014

Fig. L
(0)
Large jaw version of E.
Versione di E per mandibole di grandi dimensioni.

DR.905.015

Fig. M
(2)
Winged clamp for bicuspid.
Uncino alato per bicuspidi.

DR.905.016

Fig. NW
Medium size molar clamp.
Uncino medio per molari.

DR.905.017

Fig. PW
(9UW,W5)
Large, bland molar clamp.
Uncino grande per molari.

Self and Manual Aspirating Syringes / Siringhe ad aspirazione sia manuale che automatica

SS•2000
Stainless Steel Series

Self Aspiration: How it works

During use, the thumb pressure on the plunger or thumb disc stretches the diaphragm over a small metal projection inside of the syringe nozzle, increasing pressure inside of the cartridge. As the thumb pressure is released, pressure inside the cartridge lessens and aspiration occurs automatically. (Instruction for use are supplied with the product)

Auto aspirazione: Come funziona

Durante l'uso, la pressione esercitata sullo stantuffo o sul disco fa dilatare il diaframma posto sull'estremità della fiala. Questo contribuisce ad aumentare la pressione all'interno delle fiala. Rilasciando lo stantuffo si determina una caduta della pressione che automaticamente si trasforma in aspirazione. (Istruzioni fornite con il prodotto)

€ 47.00

SS•2000

Disc System

Dual self aspiration system:

Disc system syringe has dual aspiration feature to achieve self aspiration.

Aspiration before injection:

Insert syringe in tissue and press Thumb disc to achieve aspiration.

Aspiration during injection:

Automatic aspiration occurs whenever pressure on the plunger is released.

A Disco

Duplice sistema auto aspirante:

La siringa a disco ha duplice effetto auto aspirante

Aspirazione prima dell'iniezione:

Inserire la siringa nel tessuto e premere il disco per ottenere l'aspirazione.

Aspirazione durante l'iniezione:

Al rilascio dello stantuffo si verifica una aspirazione automatica

Needle Re-cappers / Base riponi ago

SS•2000
Stainless Steel Series

Falcon Needle Re-Cappers are the ideal way to prevent needle stick injuries when recapping needles. Place the upturned needle cap into Falcon Re-Capper and re-sheathing becomes a simple one hand procedure.

Il Falcon Needle Re-capper (base riponi ago) consente di riporre l'ago nel suo cappuccio dopo l'uso evitando spiacevoli ferite. Porre il cappuccio con l'apertura rivolta verso l'alto nel Falcon Needle Re-capper, il re-instrimento dell'ago nel suo cappuccio diviene un'operazione sicura da eseguire con una sola mano.

Atraumatic Extraction Estrazione atraumatica

Periotomes / Periotomi € 14.25

PERIOTOMES

Periotomes are dental instruments used to cut periodontal ligaments for atraumatic tooth extractions and dental implant placement. They have thin sharp blades to facilitate the removal of teeth with minimal damage to surrounding alveolar bone.

PERIOTOMI

I periotomi sono strumenti dentali utilizzati per scollare i legamenti del dente, per permettere un'estrazione atraumatica ed un miglior posizionamento dell'impianto dentale.

La lama fine e affilata facilita la rimozione dei denti in maniera minimamente invasiva permettendo di danneggiare al minimo l'osso alveolare circostante.

Deep and Secure Grip

Fine and sharp beaks cut trough periodontium to achieve contact with root structure.

Reduce Fracture of Crown and Roots

Anatomically shaped to perfectly match the teeth and allow to reach deep and large contact areas to provide secure grip, thus avoiding fracture of the brittle crown.

Reduce Trauma of Soft Tissues

The fine beaks fit in areas where standard design cannot be applied and reduce trauma to the soft tissues as they are reflected rather than crushed.

Presenza Profonda e Sicura

Le punte fini e taglienti tagliano il parodonto permettendo di raggiungere la struttura delle radici.

Riduzione delle fratture di corone e radici

La sagoma anatomica permette di adattarsi perfettamente ai denti e di raggiungere zone di contatto ampie e profonde evitando la frattura delle (fragili) corone.

Riduzione di Traumi ai Tessuti Molli

Le punte rastremate consentono di raggiungere zone inaccessibili ai modelli in uso comune e permettono quindi di ridurre i traumi ai tessuti molli che vengono divaricati anziché schiacciati.

Root Elevators / Leve per radici € 17.10

Ergo-form Elevators

Tips are made of special grade stainless steel and are TIN coated:

Benefits:

- Edge stays sharp longer
- Longer life than ordinary stainless steel elevators
- Improved smoothness for easy sliding in and out
- Non toxic TIN coating

Available in new and existing best selling models

Punte realizzate con acciai speciali e rivestite con Nitruro di Titanio

Vantaggi:

- Maggiore durata dell'affilatura
- Maggiore durata rispetto alle leve in acciaio tradizionale
- Le superfici lisce rendono l'intervento più agevole
- Rivestimento TIN atossico

Disponibili in modelli nuovi e tradizionali

Bone condensing osteotomes Tapered convex tips

In case of soft bone structure, bone condensers are used for lateral condensation to achieve bone stability in closed sinus elevation technique. Convex tips minimize the risk of perforation when lifting the Schneider's membrane.

Osteotomi per condensare l'osso Punte conico/convesse

I condensatori di osso vengono usati per condensare lateralmente strutture ossee poco consistenti nelle tecniche di rialzo del seno mascellare. Le punte convesse minimizzano il rischio di perforazione durante il rialzo della membrana di Schneider.

Sinus lift osteotomes Straight concave tips

Used for closed sinus elevation technique, concave semi-sharp tips lift sinus floor and additional bone towards cranial to achieve stable foundation for the placement of implants.

Osteotomi per il rialzo del seno Punte dritte concave

Usati con la tecnica di elevazione del seno 'closed sinus elevation'. Le punte concave semiaffilate asportano particelle di osso che vengono spinte verso l'alto in modo da aumentare il rialzo dello stesso.

Soft brushing instruments

The concept of the Soft Brushing is to disorganize the collagen fibers of the fibrous periosteum: the stiffness is reduced and the flap release increases just by using the brushes. The brush tools do not cut anything. The flap release is the result of the separation of the periosteum fibers.

Strumenti per Soft Brushing

Il concetto di 'Soft Brushing' è quello di disorganizzare fibre di collagene del periostio fibroso: questo riduce la rigidità e aumenta il lembo attraverso l'uso di questi strumenti. Gli strumenti soft brushing non tagliano alcunché. Il lembo ottenuto è il risultato della separazione delle fibre del periostio.

Titanium micro needle holders

Micro porta aghi in titanio

Titanium needle holders are much lighter compared to their stainless steel equivalent (minus 40%). They are totally corrosion resistant due to lack ferrous elements, they are bio-compatible and are a lot more durable compared to other raw materials.

I porta aghi in Titanio sono molto più leggeri rispetto ai loro equivalenti in acciaio (circa il 40% in meno). Hanno inoltre una particolare resistenza alla corrosione derivante dalla totale assenza di ferro, sono bio-compatibili e hanno una maggiore durata rispetto ai modelli realizzati con altri materiali.

Scissors with Tungsten Carbide Inserts / Forbici con riporti al carburo di tungsteno

Key Features:

- Extremely smooth cutting with less trauma.
- Manufactured from high quality stainless steel and tungsten carbide inserts for longer-lasting cutting edge.
- Gold plated rings.

Caratteristiche:

- Taglio di precisione atraumatico.
- Realizzate con acciai di elevata qualità e riporti al carburo di tungsteno per mantenere a lungo il taglio.
- Anelli placcati d'oro.

Laboratory Instruments Strumenti per Laboratorio

Tungsten Carbide Burs / Fresoni al carburo di tungsteno

- Made of high quality Tungsten Carbide
- Precision tothing, superior cutting and durable
- Perfectly concentric
- Available in x-fine, fine, medium, coarse and x-coarse grits
- Color coded according to grit type
- Standard ISO patterns

- Realizzate in carburo di tungsteno di elevata qualità
- Dentatura di precisione, qualità del taglio e durata superiori
- Perfetta concentricità
- Disponibili con grana extra fine, fine, grossa ed extra grossa
- Grana codificata a colori
- Conformi agli standard ISO

Cross Cut Fine (ISO-No. 140)

For delicate and difficult trimming of hard alloys, acrylics and ceramics.
Per rifinire con precisione e delicatezza leghe dure, acrilici e ceramiche.

Ligature Pliers / Pinze per legatura

Falcon offers wide variety of pliers for ligatures wires with or without tungsten carbide
inserts.

Falcon and Smaha pattern pliers have finer tips than standard Mathieu patterns, these
are also suitable for placing elastic ligatures.

La Falcon offre una vasta varietà di pinze per legature con e senza riporti in carburo di
tungsteno.

I modelli Falcon e Smaha hanno le punte più fini dei Mathieu e sono quindi anche adatte
a posizionare le legature elastiche.
